

Course Syllabus

CCSK Bootcamp

We are glad you have joined us for this course! Here is some information that will help you to navigate your learning platform and locate course content.

Joining the Session

Before the first live session please confirm that you can access Zoom:

1. Visit <https://support.zoom.us> and click on **Getting Started**.
2. Attn Percipio Users - The **Join live course** option is available where you registered for the session in Percipio 15 minutes prior to the start of class.

Course Description

As organizations migrate to the cloud, they need information security professionals who are cloud-savvy. The Certificate of Cloud Security Knowledge (CCSK) certificate is widely recognized as the standard of expertise for cloud security and gives you a cohesive and vendor-neutral understanding of how to secure data in the cloud. The CCSK credential is the foundation to prepare you to earn additional cloud credentials specific to certain vendors or job functions.

Earning the CCSK will provide you with the knowledge to effectively develop a holistic cloud security program relative to globally accepted standards. This course covers key areas, including best practices for IAM, cloud incident response, application security, data encryption, SecaaS, securing emerging technologies, and more.

Target Audience

Candidates studying for the CCSK exam.

Objectives

Discuss the following areas

- Best practices for IAM.
- Cloud incident response
- Application security
- Data encryption
- SecaaS
- Securing emerging technologies

Agenda

Day 1:

1. Cloud Computing Concepts & Architectures
2. Cloud Governance and Strategies
3. Risk, Audit and Compliance
4. Organization Management
5. Identity and Access Management
6. Security Monitoring

Day 2:

7. Infrastructure & Networking
8. Cloud Workload Security
9. Data Security
10. Application Security
11. Incident Response & Resilience
12. Related Technologies & Exam Prep Strategies
